- Digital-Synthesized Tuning ■ Fluorescent Power/Tuning Meters

Realistic STA-2280. Advanced features and dynamic audio power combine to add a new dimension to high-fidelity sound. The stereo expander circuit creates an effect similar to the latest reflecting-type speakers. You hear a wide sound stage which extends *beyond* the speakers. Every vocalist and instrument sound seems to come from a more precise position, giving the music an amazing "live" quality. And since IMX widens the sound field electronically, you can vary it to suit your listening area and also enjoy it with headphones. IMX can be switched out for an instant comparison with unprocessed audio. Tuner features a search mode for scanning up and down the FM and AM bands automatically—the system stops at each station

and locks it on-frequency. You can use the feather-touch control bar for manual tuning, and program 6 FM and 6 AM stations in memory for instant recall. Exact station frequencies are shown on the digital fluorescent display. FM muting eliminates tuning noise between stations. Separate 11-step bass, treble and midrange controls, loudness for improved bass response at low volume. High-filter cleans up record "scratch". Subsonic filter cuts power-robbing distortion. Stereo/mono pushbutton. Monitor and dubbing controls for two tape decks. Also has inputs for compact disc player, video sound source and magnetic turntable. LED indicators for function, memory, FM stereo and stereo expander. AC operation. **31-3006 999.95**

Removable Carry Tray ■ Speaks 11 Different Phrases ■ Movable Arms

Amazing entertainment for the entire family! Turn Robie Jr. on and he greets you by saying "hello". Then select either "stay" or "walk" mode. Tandy 1000 SX. Since its introduction, the Tandy 1000 went on to become the hottest IBM PC compatible to hit the market. Now we've made it even better. The 1000 SX is centered around the 8088 microprocessor, ensuring compatibility with industry-standard MS-DOS software. But unlike other "industry-standard" computers, you can run virtually all of your programs *one and one-half times as fast with a 1000 SX*. This user-switchable speed control lets you finish spreadsheets, sort data bases and display intricate charts and graphs faster than ever. To complement this new level of sophisticated performance, the 1000 SX comes with 384K RAM (expandable to 640K on the main board) and two built-in disk drives. And with five card slots, it's easier than ever to expand your system. Expansion boards are user installable, and you can choose from memory expansions, internal modems—even a 20-megabyte hard disk card! We've redesigned our popular DeskMate 6-in-1 applications software to take advantage of the Tandy 1000 SX's power, too. DeskMate II for the Tandy 1000 SX features six applications on one disk. And with the special task-switching feature you

can exit DeskMate, enter an applications program, then return to DeskMate—all with just a few keystrokes. With the Tandy 1000 SX, the "options" you expect to pay more for are included. Monochrome and color graphics adapters are built in for easy hookup to a monitor. Adapters for a printer, joysticks, or light pen are all standard, as well as the disk operating system and BASIC. **25-1051**
